

Snowflake fun

Use one or all of the shapes on this page to create your own special snowflake.

Directions

1. Cut out the shapes on the dotted line.
2. Fold the shapes in half until they become small triangles.
3. Cut out parts of your triangle around the edges. Be careful to not cut too far though—you don't want to cut your triangle in half.
4. Unfold your triangle and . . . your snowflake is ready!
